

Joint Transition Strategy Working Group

Transition Model

This model has been designed to outline the Griffith College & Griffith University transition initiatives and activities conducted at various touch points throughout the student lifecycle.

The model is based on the Transition Framework which has been developed and implemented by the College/University, in order to fulfil its commitment to providing students with a high quality learning experience.

This is achieved by engaging and supporting students through a diverse range of personal, academic and professional support initiatives, which are detailed within the framework and this model.
